

Pressure Sensitive Mats

Made with high quality Crypton material

Bed Sensor Mat

We make and import our very own bed mats! All of our mats are made with high quality anti-bacterial Crypton material and the pressure plate is encased in an internal waterproof bladder. We weren't happy with what was available in the market so we made our own – tried and tested for the last 10 years in Australia and New Zealand. A product we truly stand by and trust you will too!

- In bed sensor for either on top or under mattress.
- Two sizes for use in standard and folding beds

Chair Sensor Mat

On chair pressure sensitive alarm pads to sense when a patient is attempting to leave a seated position.

Floor Sensor Mat

Pressure sensitive mat that alarms when the resident leaves the bed and puts their feet on the floor.

Adapters

Adapts the mats to most nurse call systems, plugs into current Nurse Call System and presents notifications in the same way a pendant does. Trials are possible to ensure they work with your system. Battery operated.
